In re: JCE Licenses, LLC (JCE)
WFTL(AM), West Palm Beach, Florida
Facility Identification Number: 29490
File Number: BMP-20031024AAV

Dear Mr. Lepore:

This letter is in reference to the above captioned application filed by JCE, licensee of station WFTL(AM), to modify Construction Permit BP-1990521AI by changing the WFTL(AM) directional antenna patterns, and the November 20, 2008, amendment to reduce the nighttime directional antenna power.

A preliminary review of the amended application reveals that the proposed daytime 0.025 mV/m groundwave contour overlaps 0.5 mV/m contour of co-channel Cuban stations CMGB, Trinidad, and CMJB, Mayari Arrib. Since there is an increase in the radiation towards Cuba as compared to Construction Permit BP-19990521AI, the proposal must be notified to the International Telecommunications Union (ITU) for review. Thus, JCE must submit a formal request through the Secretary of the FCC that no further action be taken on the application until after the ITU notification process has been completed. It should be noted that the FCC's International Bureau records indicate that Construction Permit BP-19990521AI was accepted by the ITU, and this new ITU notification will supersede the BP-19990521AI parameters, regardless of whether the ITU accepts or objects the new parameters. Consequently, there may be a loss of any grandfathered protection. Questions regarding foreign station protection or the ITU notification process should be directed to George Fehlner at (202) 418-2197.

Further action on the subject application will be withheld for a period of thirty (30) days from the date of this letter to provide JCE an opportunity to file a curative electronic amendment. Failure to amend or respond will result in the dismissal of the application pursuant to Section 73.3568 of the Commission's Rules.

Sincerely,

Son Nguyen
